<b>Re:</b> US Patent Application Serial No. 09/937,282 (Prov. No. 60/126,338)	<b>Pages:</b> <u>3</u> total

Dear Sir:

I am transmitting herewith the first page of the published application (US 20040211694 A1) and the Abstract from the PCT application (U.S Ser. No. 09/937,282) to bring to your attention that the Abstract in the published application is incorrect and has no relation to our invention: "WIRE-COIL PACKAGING DRUM WITH IMPROVED BOTTOM ASSEMBLY". The abstract in the publication document (US 20040211694 A1) is for a "game machine", not a Wire-Coil Packaging Drum.

The Abstract under the PCT Application is correct and it is this Abstract ("An improved wire-coil packaging drum comprises a drum...") that should be incorporated into the published application and the issued patent, when it is granted.

I have already communicated verbally and by e-mail with the application section which referred me to the "post-grant" publication section which then referred me to the "pre-grant" section which then referred me back to the application section. My request is simply to get the Abstract correctly stated, pre-grant, to avoid an error in the issued patent and the necessity of filing a post grant request for correction.

I will greatly appreciate your assistance in resolving this matter. If I can be of any further assistance, please do not hesitate to contact me.

Respectfully Submitted,

Jane White, Paralegal
